Section3 : Hazards Identification

☆☆☆☆☆ Emergency Overview ☆☆☆☆☆

HMIS	Health : 1	Flammability : 1	Reactivity : 0	PPE:See section 8
NFPA	Health : 1	Flammability : 1	Reactivity : 0	

The Most Important Hazards
Adverse Human Health Effects :
There are no significant hazards expected with intended use.
Potential Health Effects
Primary Entry Routes :
Inhalation ; Yes
Skin ; Yes
Ingestion ; Yes
Environmental Effects :
There are no significant hazards expected with intended use.
Physical and Chemical Hazards :
There are no significant hazards expected with intended use.
Specific Hazards :
Dust explosion (like most finely grained organic powders)
Main Symptoms :
Acute Inhalation Toxicity
Exposure to excessive amount of dust may cause physical irritation to respiratory tract.
Acute Oral Toxicity
Low acute toxicity in animal experiment.
Acute Eye Irritation
May cause slight transient irritation.
Acute Skin Irritation
May be non-irritant.
Sensitization
From test no apparent significant hazards are expected . (Only few cases reported on incidental allergy-related conjunctivitis or dermatitis.)
Chronic Effect
Slight pulmonary fibrosis has been reported in rats upon chronic inhalation exposure to a toner at 4mg/m3 every day for 2 years. No pulmonary change was found at 1mg/m3. These findings show that exposure to excessive amounts of powder may cause damage to lungs. However, normal use and handling of this product as intended, does not result in inhalation of excessive amounts of powder.
Carcinogenicity
Titanium dioxide contained in this product are classified to Group 2B of IARC as the result of inhalation test in use of rat.
But oral/skin test does not show carcinogenicity.
In the animal experiment with very high concentration of titanium dioxide (excessive burden of rat's lungs clearance mechanism (overload phenomenon)), the rat alone showed lung tumor.
Under a normal use practice, the concentration should be far lower than the above; and it is assumed that there is no such use.
Also, relation between respiratory disease and work exposure of titanium dioxide is not observed with epidemiological survey.
Medical Conditions Aggravated by Exposure
Not applicable
Classification of the Chemical Product
This mixture is not classified as dangerous.

Section4 : First Aid Measures

Inhalation :
Remove from exposure to fresh air and rinse mouth with water. Seek medical advice.
Skin Contact :
Wash thoroughly with soapy water.
Eye Contact :
Flush with a large amount of water until particle is removed. Seek medical advice.
Ingestion :
Drink several glasses of water to dilute ingested toner. Seek medical advice.
Immediate Medical Attention :
Immediate medical attention is not required.

Section5 : Fire Fighting Measures

Burning Rate (mm/sec) : 0.223 or below
Autoignition Temperature (degrees centigrade) : Not available
Flammable Limits(%) : LEL Not available UEL Not available
Extinguishing Media to Avoid :

No special fire protecting method is required. Sprinkling or fire extinguishers can be used.
Protection of Firefighters :
Wear gloves, glasses, a mask if necessary.

Section6 : Accidental Release Measures

Personal Precautions :
Do not breathe in dust.
Environment Precautions :
Do not flush into sewers or watercourses.
Methods for Cleaning Up :
Fine powder may form explosive dust-air mixture.
Confirm there is no source of fire and if there is a source, remove it. Sweep up spilled powder slowly and clean remainder with wet cloth. If a vacuum cleaner is used, a dust explosion-proof type must be chosen.
